900

Start

902

Set row count to zero

904

On 'row count' row, sweep phase delay, acquire result data for each phase and channel. Store phase value for which the result value on a given channel becomes maximum in a phase lookup table.

906

Increment row count.

908

Row count = maximum ?   No

Yes

910

Generate row/column lookup table for phase delays based on phase delay lookup table
